

Portable Ozone Generator TROG-603

www.axylab.com | info@axylab.com

Overview

Portable Ozone Generator TROG-603 is a practical and portable device. It can be used for various sterilization and cleaning processes. This applies to the use of air and water due to the operating principle of tube-type high voltage discharge paths. It can generate O₃ at a rate of 7g / h. Moreover, it is equipped with stainless steel. It has good performance and long life.

Features:

- It is having with good performance and long life
- It is equipped with a stainless steel chamber
- This applies to the use of air and water due to the operating principle of tube-type high voltage discharge paths
- It has a lightweight and portable device
- It can generate O₃ ranges
- It is having with an ozone concentration
- Intended with a high voltage ionization
- It is both industry and household type
- It is an automatic control time type device
- It is having with a cool wind of 10m/s

Specifications :

Application	Both can use air and water
O3 range	7 g/h
Overall size	500 ×160× 220 mm
Packing Size	550×220×270 mm
Power	220V/ 50HZ

Northeast McClain Road Bentonville AR 72712, USA
